

Proposed 2005 CADR Form Changes

As of January 1, 2005, all CARE Act funded grantees will be required to use a revised version of the CARE Act Data Report (CADR) to collect data on all services funded by HAB. Currently under review by the Office of Management and Budget (OMB), the 2005 CADR incorporates a number of changes and includes some data elements not previously requested on prior versions of the form.

Following are two documents that have been prepared to assist you as you begin the process of modifying your data collection and reporting systems. The first is a draft of the 2005 CADR with new and changed elements highlighted. The second is a crosswalk of the 2004 and draft 2005 versions of the CADR form. We hope you find these documents useful as you prepare for the 2005 CARE Act Data Report.

Some of the planned changes are summarized in the table below.

Cover Page	Grantees will need to report their nine-digit Data Universal Numbering System (DUNS) Number.
Throughout Report	New HIV indeterminate response categories have been added for clients under age 2.
	Race and ethnicity are no longer considered separate categories.
Sec.1 Part 1.2	Providers will report funding received through the Minority AIDS Initiative (MAI).
Sec.3	Cells for affected client and visit counts in rows a-i have been opened, however, only for Title IV grantees.
Sec.5	New questions have been added regarding medical care/services received during reporting period.
	Additional information will be requested on pregnant women and children delivered.
Sec.7	ADAP/ APA information is no longer to be collected as part of the CADR. Instead, there will be a separate quarterly ADAP/ APA Data Report that will be submitted to HAB.

For more information, please visit HAB's "Preparing for the 2005 CADR" webpage at <http://hab.hrsa.gov/tools/2005cadr.htm> .

****PLEASE NOTE: THE 2005 CADR SHOULD NOT BE USED TO REPORT 2004 DATA.**
